

Autobiographical essay

APPLICANT'S NAME: VICTOR KWIZERA

In my childhood ,I have been raised by both my parents who thought us so much the things concerning the word of God and Christian values and displines.they did that by doing home devotions and in fellowshiping with others in church which helped us(my siblings too) a lot.

About my education, I did science in my secondary school and after I joined a college to study civil engineering meanwhile I tried to pursuit training on information technology which I did. Addition to that I always have dream to serve the kingdom of God that is how I tried to be informed and skilled so that I can be able to serve in this current century.

My involvement in ministry was much more in school than in local church. Where my job was to evangelize and be part of charity activities. When I was in high school I was the president of evangelism.

Though I was born in Christian life I was just a churchy guy but accepting Jesus as my lord and savior was sure not yet until 2010 when I made my decision and ever since I knew that the good news I have just received should be received by many and that made the differences with the kind of person I was because now is not only knowing the truth but pass it to other for them to know too.

About personal qualification I may say that am still striving for more but being skilled in other field and also being filled with Holy Spirit and now longing to know more about the word of God is promising in the ministry.

My view on God, I do believe in trinity God the father, Jesus Christ the son and the Holy Spirit.

About the evidence of faith in my life I may say that my life is built on Christ I mean his words his promises and his grace .This makes me who I am today that it is my identity.
